PROFILE

I am a Bachelor of Engineering student majoring in Computer Science and Engineering. I have a strong understanding of web development using HTML and CSS and intermediate knowledge of Java programming. I am skilled at creating responsive and attractive web pages and have a good grasp of object-oriented programming in Java.

PROJECTS

College Canteen Management System :

The College Canteen Management System is a web-based application designed to streamline the ordering, payment, and management of canteen services, making the process more efficient and user-friendly.

Online Leave Management System :

The Online Leave Management System is a web-based application that automates and simplifies employee leave requests, approvals, and management, replacing traditional paper-based processes with an efficient digital solution.
